

Your Hospital Transition in Care Partner

Pharmacist Partners[®] leads hospitals to develop ways to incorporate medication reconciliation and other best practice principles into successful transition in care programs.

Pharmacist Partners[®] is dedicated to improving patient health and reducing hospital readmissions. We accomplish this by interacting with practitioners who become better equipped to prescribe and counsel patients.

RxConnectLive™

The Live-Touch Solution

Pharmacist Partners[®] is the only transition in care company that matches licensed pharmacists one-to-one with patients and their caregivers, in the hospital and in their homes, to ensure that all prescribed medications are safe and appropriate, and are taken effectively.

What is a CKO™?

Clinical Knowledge Organization

A CKO drives change within the healthcare marketplace by placing a higher value on educating practitioners while advocating for patients.

Value to your hospital

Improved coordination of care across settings:

- Decreased avoidable utilizations
- Reduced readmissions
- Measurable cost-savings
